We believe in a low impact tourism. The Bozburun Peninsula is a protected nature area so we go to great lengths to minimise our impact on the environment.

We have invested in the latest 100% ecological cleaning systems in each private pool plus installing water softening systems which means that we use NO chemicals in our pools. Our guests love our pools as they do not smell of chlorine and do not pollute the environment.

We have also invested in the latest generation of solar water heating systems as these are far more efficient than panel systems. We have drilled wells and installed automatic drip watering systems in the gardens to minimise the amount of water we take from the village.

The mayor supports our way of investing in the community.

We arrange transfers and rental cars delivered to the villas by the day.

Just book your flights and leave the rest to us for fabulous luxury villa holidays in unspoilt Turkey.

The Bozburun Peninsula

The Bozburun Peninsula is one of the most beautiful parts of Turkey as it is protected by the Government and classed as a natural environment. This means that all development is severely limited with high rise construction banned throughout the peninsula.

Because of this, the Bozburun Peninsula is often referred to as a living museum as the way of life is largely unchanged from decades ago.

This makes it very attractive to visitors who are looking for a wonderfully relaxing place to stay, and explore the villages dotted along the peninsula. Compared to bustling Marmaris, all the villages along the Bozburun Peninsula are quiet and you will find the locals very friendly.
